

## Treatment of Tuberculosis (TB) - Online Refresher Course

understanding **Author:** World Medical Association Global Tuberculosis Institute at Rutgers The State University of New Jersey

**Publication Date:** 2009

**Format:** Course

**Physical Description:** 95 p.: col.

**Language:** English

### Abstract:

The TB course is intended as a refresher course for physicians (both public and private) that may be involved in the management and care of patients with TB. The course is developed as a preparation course to the MDR-TB course of WMA and both courses together offer a complete training module on TB. The refresher course will provide basic clinical care information for TB including the latest diagnostics, treatment and information about multidrug-resistant TB. It will also provide information on how to ensure patient adherence and infection control and will include many aspects of TB care and management with a global scope so that it can be used across regions.

This course was developed with support from the Lilly MDR-TB Partnership and technical assistance from the New Jersey Medical School Global Tuberculosis Institute.
